

Landing Page Project Report

1. Internship Details

- **Internship Program:** OIBSIP Internship
- **Domain:** Web Development
- **Task Number:** 1

2. Intern Information

- **Name:** Nadaru Gagana Sri
- **Email:** gagnasrinadaru@gmail.com
- **College/Organization:** Vellore Institution of Technology-AP University

3. Task Description

The task was to create a **professional landing page** as a beginner-friendly web development project. The landing page should demonstrate knowledge of **HTML, CSS, and JavaScript**, with proper layout, design, and interactivity.

4. Project Objective

- To practice front-end development skills.
- To learn how to structure folders professionally.
- To implement hover effects and responsive layouts.

5. Project Summary

- Created a landing page with **header, banner, services, contact, and footer** sections.
- Used **CSS** to style the page professionally and ensure proper spacing, padding, and color palette.
- Used **JavaScript** to add hover effects for service boxes.
- Prepared **Documentation** and **Report** for submission.

6. Learning Outcome

- Understanding folder structure for web projects.
- Linking CSS and JavaScript files correctly to HTML.
- Creating interactive elements using JavaScript.
- Preparing professional project documentation and reports.

7. Conclusion

This project successfully demonstrates the creation of a professional landing page suitable for beginner-level web development tasks. All files are organized and uploaded in GitHub as per internship requirements.
